

Report to City Council

TO: Mayor and City Council

FROM: Dena Heald, Chief Financial Officer/City Treasurer

AGENDA DATE: August 19, 2025

TITLE: RECEIPT OF QUARTERLY INVESTMENT REPORT FOR THE QUARTER ENDED JUNE 30, 2025 (REPORT OF: FINANCIAL & MANAGEMENT SERVICES) (ALL DISTRICTS)

TITLE SUMMARY: Quarterly Investment Report

DISTRICT: All Districts

Recommendation(s)

That the City Council:

1. Receive and file the Quarterly Investment Report for the quarter ended June 30, 2025, in compliance with the City's Investment Policy.

SUMMARY

The attached Quarterly Investment Report presents the City's cash and investments for the quarter that ended June 30, 2025. This report is in compliance with the California Government Code Section 53646 regarding the reporting of detailed information on all securities, investments, and monies of the City, as well as the reporting of the market value of the investments held. All the investments contained within the portfolio are in full compliance with the City's Investment Policy and Government Code Section 53601 as to the types of investments allowed. It is recommended that the City Council receive and file the attached Quarterly Investment Report.

DISCUSSION

The City maintains a portfolio of investments in order to earn interest on cash balances that are not currently required to fund operations. California Government Code Sections 53601 and 53646 establish the types of investments allowed, the governing restrictions on these investments, the third-party custodian arrangement for certain investments, and the reporting practices related to the portfolios of local agencies. In keeping with best practices, the City has implemented an Investment Policy, which was last reviewed by the City Council on May 20, 2025. The policy is in full compliance with the requirements of both of the above-mentioned Code Sections.

The attached Quarterly Investment Report presents the City's cash and investments for the quarter that ended June 30, 2025. The report complies with California Government Code Section 53646 regarding the reporting of detailed information on all securities, investments, and monies of the City, as well as the reporting of the market value of the investments held. All of the investments contained within the portfolio are in full compliance with the City's Investment Policy and Government Code Section 53601 as to the types of investments allowed. As stated in the attached report, there is more than adequate liquidity within the portfolio for the City to meet its budgeted expenditures over the next six months.

The City's investment policy has set the primary goals of the portfolio management as Safety and Liquidity followed by Yield. The City's cash flow requirements are evaluated on an ongoing basis, with short-term needs accommodated through the City's pooled investment funds with Local Agency Investment Fund (LAIF) and California CLASS. LAIF is a pool of public funds managed by the State Treasurer of California, providing 24-hour liquidity while yielding a rate of return approximately equivalent to a one-year treasury bill. California CLASS is a Joint Powers Authority investment pool that provides public agencies the opportunity to invest funds on a cooperative basis in rated pools managed in accordance with state law. With the combined use of a conservative approach to evaluating cash flow needs and LAIF and California CLASS liquidity, the City will not have to liquidate securities at current market rates that are intended to be held for longer-term investment.

The table below shows some of the key portfolio measures for the month.

	Portfolio Balance	Avg. Yield to Maturity Trends		
		June 2025	May 2025	June 2024
Investments	\$249,226,311	3.820%	3.790%	3.36%
LAIF	\$65,129,234	4.269%	4.272%	4.480%
California CLASS	\$146,436,744	4.343%	4.352%	5.401%

Bond proceeds are held and invested by a Trustee. The investment of these funds is governed by an investment policy approved by the City Council as a part of the governing documents for each specific bond issue. Deferred Compensation Plan funds are not included in the report since these funds are held and invested by the respective plan administrators based on the direction of the participating employees. These funds are

placed in a trust separate from City funds.

ALTERNATIVES

1. Receive and file the Quarterly Investment Report for June 30, 2025. **Staff recommends this alternative as it accomplishes timely investment reporting.**
2. Do not accept and file the Quarterly Investment Report and provide staff with additional direction. **Staff does not recommend this alternative as it will not accomplish timely investment reporting.**

FISCAL IMPACT

For additional information regarding the bond market, please see the attached Bond Market Review provided by Chandler Asset Management.

	467,970,081	470,467,752	470,796,401			
Total Funds with Fiscal Agents		37,508				
Total Investment Portfolio		470,505,260				

1. I hereby certify that the investments are in compliance with the investment policy adopted by the City Council. There are no items of non-compliance for this period.
2. The market values for the investments in the General Portfolio are provided by the City's investment advisors.
3. The market value for LAIF is provided by the State Treasurer's Office.
4. The market values for investments held by fiscal agents are provided by each respective trustee or fiscal agent.
5. The value of LAIF incorporates accrued interest receivable provided by the City's investment advisors.
6. The City has the ability to meet its budgeted expenditures for the next six months pending any future action by City Council or any unforeseen catastrophic event.

/S/ Dena Heald

Chief Financial Officer/City Treasurer

Notes:

- (1) Total General Portfolio includes all assets that comprise the City's Investment Portfolio which is LAIF, California CLASS, as well as assets managed by Chandler Asset Management.
- (2) Yield to Maturity (YTM): The rate of return on an investment or security if it were to be held until maturity. This yield does not reflect changes in the market value of a security.
- (3) Rate of Return represents the gain or loss on an investment or portfolio of investments over a specified period, expressed as a percentage of increase over the initial investment cost. Gains on investments are considered to be any income received from the security or portfolio plus any realized capital gain. This measure of return recognizes the changes in market values of a security or portfolio of securities.
- (4) The Rate of Return for the investment portfolio reflects the performance of the portfolio during the past twelve months.
- (5) The portfolio benchmark is the ICE Bank of America-Merrill Lynch 1 to 5 year Government Index.

PORTFOLIO CHARACTERISTICS

The portfolio invested in LAIF and California CLASS represents the City's immediate cash liquidity needs and is managed by City staff in a manner to fund the day to day operations of the City.

The portfolio managed by Chandler is comprised of idle cash balances related to funds that generally expect to expend cash with the next 12 to 60 months.

June 2025

Market Summary

As the midyear point of 2025 quickly approaches, economic data for the first half has indicated an easing of inflationary pressure. Nevertheless, core prices remain above target levels, and tariff related disruptions may surface in the second half of the year. In May, job creation was robust; however, initial and continuing jobless claims trended slightly higher. Thus, the labor market continues to reflect an improved balance between supply and demand for workers. Given the current economic outlook, the Chandler team expects gradual normalization of monetary policy and a steepening yield curve.

The Federal Open Market Committee (FOMC) left the Federal Funds Rate unchanged, as projected, at 4.25 - 4.50% at the May meeting. Progress on inflation, paired with a softening labor market and uncertainty surrounding fiscal policy, leaves Fed policy makers reluctant to express firm conviction for the direction of near-term monetary policy. Fed Chair Powell continues to emphasize the Committee's "wait and see" data-dependent approach.

US Treasury yields increased in May. The 2-year Treasury yield increased nearly 30 basis points to 3.90%, the 5-year Treasury increased 23 basis points to 3.96%, and the 10-year Treasury yield also increased 23 basis points to 4.40%. The spread between the 2-year and 10-year Treasury yield points on the curve narrowed to +50 basis points at May month-end versus +56 basis points at April month-end. The spread between the 2-year Treasury and 10-year Treasury yield one year ago was -37 basis points. The spread between the 3-month and 10-year Treasury yield points on the curve was -6 basis points in May, versus -13 basis points in April.

YIELD CURVE SHIFTED UP IN MAY

Market participants shrugged off some of the initial concern over the negative effects of tariff policy as the flight-to-quality into US Treasuries reversed course driving yields up practically in unison approximately 20 basis points across the curve. Higher short-term yields suggest a broad view that the pace of rate cuts may be drawn out longer than perceived at the beginning of the year. The recent spike in medium and long-term yields is consistent with the perception that the proposed course of fiscal policy may not address the lingering budget deficit and may stoke inflation. The Chandler team projects a more cautious trajectory for rate adjustments, as the Federal Reserve weighs potential inflation pressures against signs of slowing growth.

Economic Roundup

Consumer Prices

Price increases measured by both the Consumer Price Index (CPI) and Core CPI, which excludes volatile food and energy components, showed more progress against inflation in May coming in at or below consensus expectations. The headline CPI increased 0.1% month-over-month and rose 2.4% year-over-year, while the Core CPI rose 0.1% month-over-month and 2.8% year-over-year. The Personal Consumption Expenditures (PCE) price index was significantly lower month-over-month, rising 0.1% versus the 0.7% increase in March. PCE was also lower on a year-over-year basis, rising 2.1% in April from 2.3% in March. The Core PCE deflator, which is the Fed's preferred gauge, was unchanged month-over-month at 0.1% after revisions, while lower at 2.5% versus the prior month at 2.6% year-over-year.

Retail Sales

In May, Advanced Retail Sales surprised to the downside, falling -0.9% from the prior month, which resulted in a 3.1% increase year-over-year. The slowdown was led by a mean-reverting effect following the sharp increase in vehicle sales in March as consumers anticipated price increases due to tariffs; Motor Vehicle and Parts Dealers are the largest component of the Retail Sales data. Furthermore, there was a notable drop in sales at restaurants and grocery stores, and lower gas prices creating a drag on gas station sales. On a positive note, the Control Group, which strips out the noisy data and feeds directly into the GDP calculation, increased more than anticipated at 0.4% after a decline in April. Also, Consumer Confidence rebounded from the recent trend of weakness, as the Conference Board's Consumer Confidence Index jumped to 98.0 after reaching a 5-year low of 85.7 in April.

Labor Market

U.S. job growth topped forecasts in May, but revisions tempered momentum. The U.S. economy added 139,000 jobs in May, topping expectations, though downward revisions to the prior two months trimmed 95,000 positions from earlier estimates. Job gains were led by healthcare and social assistance, underscoring continued strength in service-related sectors. Despite the headline beat, the labor market showed signs of cooling. The three-month and six-month averages came in at 135,000 and 157,000, respectively, reflecting a slower pace of hiring. The unemployment rate remained unchanged at 4.2%, while the labor force participation rate edged down to 62.4%, still below the pre-pandemic level of 63.3%. Broader underemployment, measured by the U-6 rate, remained unchanged at 7.8%. Nominal and real wage growth continued to converge in May, with nominal average hourly earnings rising 3.9% and real average hourly earnings rising 1.4% from a year earlier, suggesting less inflationary pressure from the labor market.

Housing Starts

Total Housing Starts were below consensus expectations for May, dropping -9.8% from April for a seasonally adjusted annual rate of 1.256 million units. The month-over-month drop was entirely attributable to a slowdown in multifamily unit starts, which fell -30.4%. Single family home starts increased marginally 0.43% from April. Although the decline in multifamily units appears dramatic, the multifamily component of Total Housing Starts is inherently more volatile than the single family component as the start or postponement of a few large projects can skew monthly data sharply up or down. It is also worth noting that the recent high levels of new single family homes available for sale are second only to the all-time highs reached in 2006-07. Meanwhile, listings for existing homes for sale have spike markedly in 2025.

World Stock Market Index Descriptions

S&P 500—The S&P 500 is a market value-weighted index of 500 large-capitalization stocks. The 500 companies included in the index capture approximately 80% of available US market capitalization. NASDAQ—The NASDAQ Composite Index is the market capitalization-weighted index of over 3,300 common stocks listed on the NASDAQ stock exchange. Dow Jones—The Dow Jones Industrial Average is an index that tracks 30 large, publicly-owned companies trading on the New York Stock Exchange and the NASDAQ. The Financial Times Stock Exchange Group (FTSE)—The FTSE is a share index of the 100 companies listed on the London Stock Exchange with the highest market capitalization. DAX—The Deutscher Aktienindex (DAX) is a blue chip stock market index consisting of the 30 major German companies trading on the Frankfurt Stock Exchange. Hang Seng—The Hang Seng Index is a freefloat-adjusted market-capitalization-weighted stock market index in Hong Kong. It is used to record and monitor daily changes of the largest companies of the Hong Kong stock market and is the main indicator of overall market performance in Hong Kong. Nikkei—Japan's Nikkei 225 Stock Average is a price-weighted index composed of Japan's top 225 blue-chip companies traded on the Tokyo Stock Exchange.

Fixed income investments are subject to interest rate, credit, and market risk. Interest rate risk: The value of fixed income investments will decline as interest rates rise. Credit risk: the possibility that the borrower may not be able to repay interest and principal. Low-rated bonds generally have to pay higher interest rates to attract investors willing to take on greater risk. Market risk: the bond market, in general, could decline due to economic conditions, especially during periods of rising interest rates. The S&P CoreLogic Case-Shiller home price index tracks monthly changes in the value of residential real estate in 20 metropolitan regions across the nation.
